

Flinders Shire Council Budget Overview

2024-2025

Flinders Shire Council Budget Summary

At a glance...

Total Revenue
\$46,981,724

**Total Operational
Expenditure**
\$41,497,740

**Total Capital
Works Budget**
\$13,322,583

Message from your Mayor

I am pleased to present our inaugural Budget for the Flinders Shire Council. Since being sworn in three months ago, your Council has made a commitment towards progress and new beginnings for the Shire. In shaping the 2024–2025 Budget, your Council has had a strong focus on sustainable growth and opportunity. Our Budget prioritises the needs and aspirations of our residents, whilst also ensuring fiscal responsibility.

Cr Kate Peddle
Mayor, Flinders Shire Council

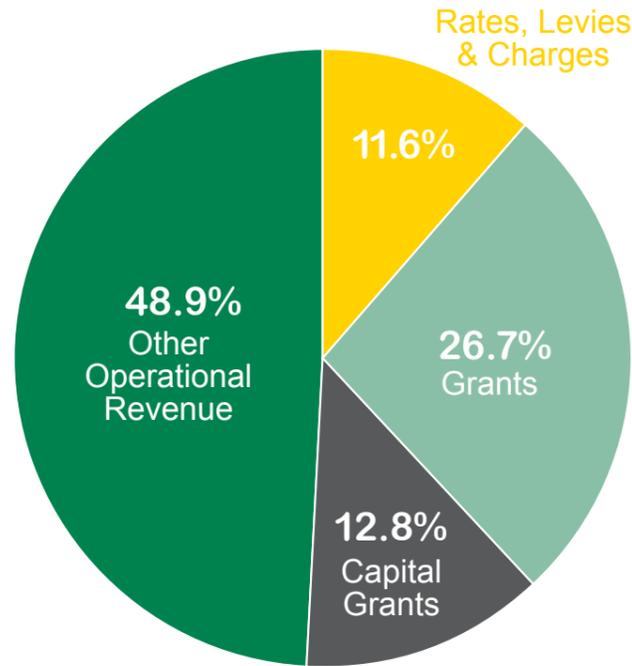

Strong internal structures are vital for any organisation’s success. With the change in leadership, we seized the opportunity to identify areas needing support and reevaluated our operations and structure with input from the Management team. This process led to identifying four new positions focusing on:

- Human Resources
- Media, Grants and Community Engagement
- Training and Development, and
- Compliance.

These positions will enhance our operational efficiency and effectiveness, provide support where most needed, and foster improved service delivery and community engagement, which I am proud to announce during this Budget.

This Budget marks a turning point for Flinders Shire Council. We are embarking on an era of sustainable growth and opportunity. We are particularly leveraging opportunities from the Queensland State Government’s \$5 billion investment in the CopperString 2032 Transmission Line to foster long-term economic stability and community development.

Total Revenue
\$46,981,724

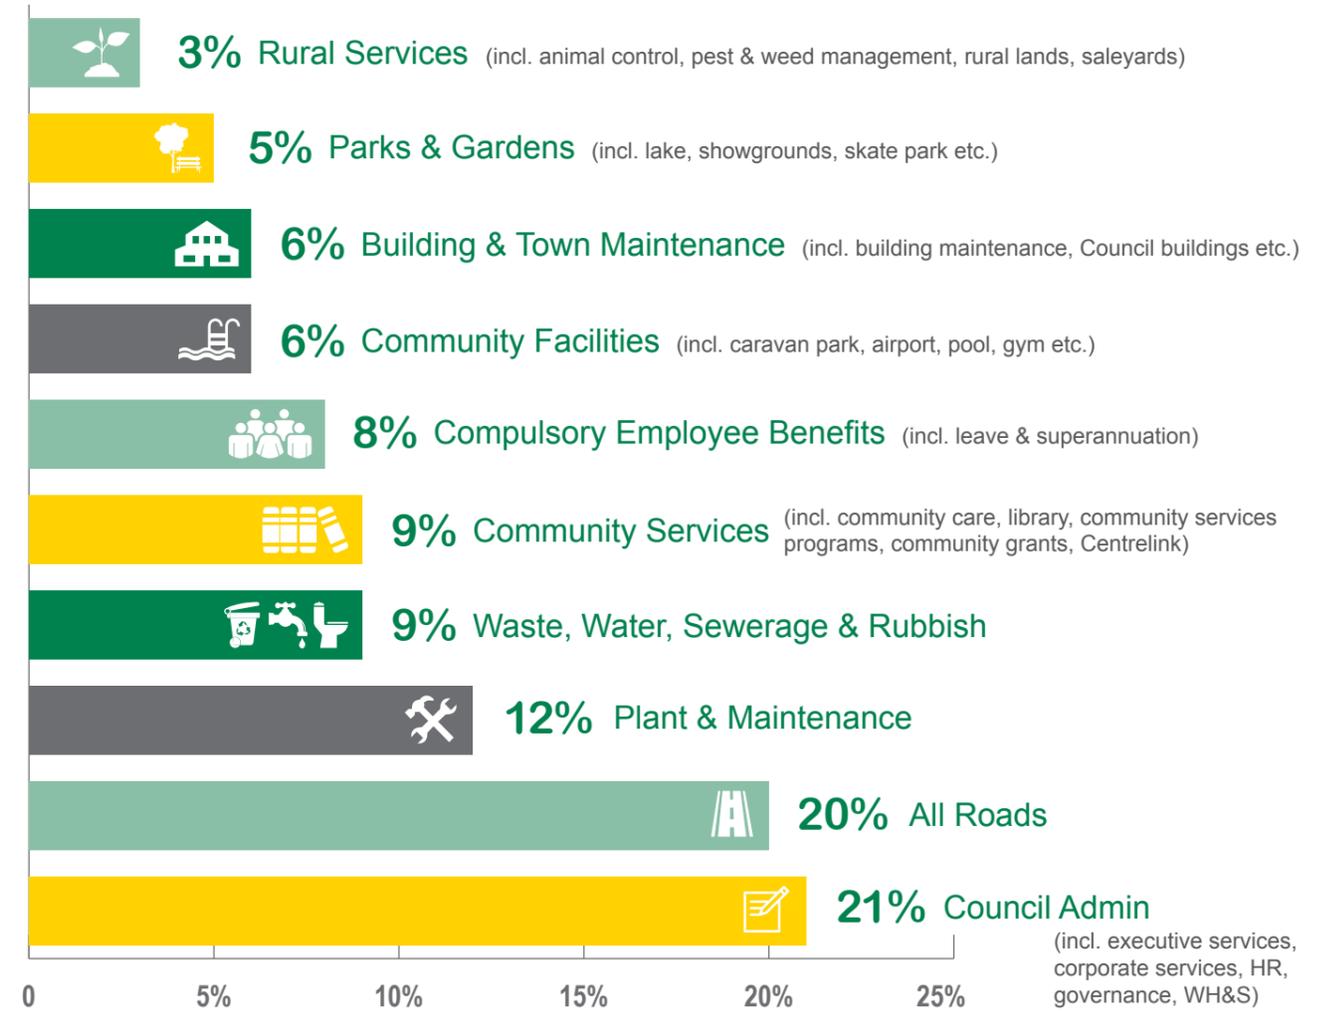

Our projected total revenue stands at \$46.9 million. Approximately 12% of this revenue derives from rates, levies, and charges, underlining our reliance on government support through funding, grants, and financial assistance. Securing long-term financial independence remains a challenge, and we are committed to investing in projects that enhance our community's welfare and expand our rate base over time.

Transparency and accountability guide our resource allocation. Our operational expenditure for the year totals \$41.9 million, distributed as follows:

- 21% for Council administrative operations, encompassing Councillor expenses, executive services, corporate services, HR, governance, and workplace health and safety
- 9% directed towards community services, supporting essential programs like community care, library services, and Centrelink support
- 20% allocated to road infrastructure maintenance, ensuring safe transportation
- 3% dedicated to rural services, including pest management and saleyard operations
- 5% invested in maintaining community facilities such as parks, and recreational amenities
- 6% for building and town maintenance, covering building upkeep, and Council facilities maintenance
- 12% allocated to plant, stores and workshop operations
- 9% allocated towards waste, water, sewerage and rubbish collection
- 8% allocated to compulsory employee benefits, including leave and superannuation
- 6% for community facilities, including the caravan park, private works, airport, workers accommodation, Flinders Discovery Centre, and the pool and gymnasium.

Total Operational Expenditure
\$41,497,740

Water

Waste, water, sewerage and rubbish collection account for 9% of our total expenditure. The cost of our water network exceeds the water rates levied by half a million dollars. This shortfall is funded from general rates. In total, we are investing an additional \$1 million to address the quality issue. The Council is acutely aware of the challenges this situation has posed for all of us. The significant annual loss incurred for water provision and the persistent quality issues are deeply concerning.

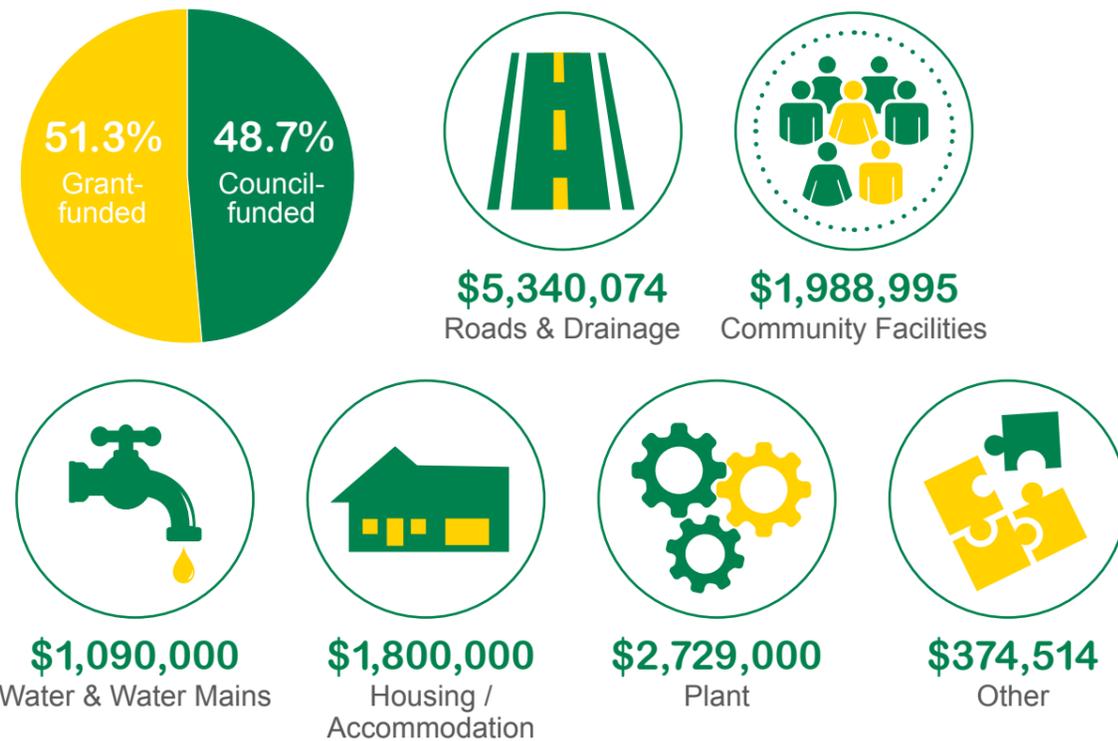

We are working diligently to identify and resolve the problem, fully aware that this will require further financial investment, and unfortunately as an increased commitment in the rates. This Council is committed to finding effective solutions that have not previously been addressed, and understands the critical importance of delivering reliable and high-quality essential services to our community.

Flinders Discovery Centre

Total Capital Works Budget \$13,322,583

Our Capital Works budget totals \$13.3 million, with 51.3% funded by grants and 48.7% by the Council.

Highlighted projects include:

Road Infrastructure Projects (jointly-funded – TID, RTR & LRCI)

- Stamford-Lerida Road
 - Formation resheeting
 - Floodway repairs
- Stamford-Marathon Road
 - Repairs to grid approaches
 - Road repairs
- Hughenden Recreational Lake
 - Seal remaining gravel section
- Ashton Road
 - Formation resheeting
- Prairievale Road
 - Drain
 - Four cement margins along floodways
- Ulva Road
 - Formation resheeting
 - Cement margins for floodways
- Swanson Street Upgrade
 - McLaren Street to Queen Street

- Installation of various new floodways
- Morell Street construction
 - Sharkey Street to McLaren Street
- Old Richmond Road
 - Progressive sealing
- Construction of New Road
 - Christison Street, Prairie

Capital Works Funded Directly by Council

- Expansion of Showgrounds RV camping area
- Medium Industrial Estate
 - Completion of drainage works
- Reseals – Rural roads (2024–2025)
- Town streets
 - Byers Street – Road reconstruction and kerbing
 - Brodie Street – Installation of structures and completion of footpaths
 - Stansfield Street – kerbing from Flynn Street to Bore No. 5
 - Reseals (2024–2025)

Brodie Street, Hughenden

- High impact industrial development
 - Identify suitable State land for heavy industrial
- Hughenden Recreational Lake
 - Lake Memorial Drive
 - Upgrade existing power supply at lake playground
- Brodie Street playground
 - Shelter and seating
- Prairie drainage works and more.

Roads funding across Queensland has faced challenges recently, as in late 2023 the Federal Government shifted its funding policy with the state from an 80/20 split to a 50/50 arrangement, adding pressure to the state's budgeting process. Concurrently, with both state and federal elections looming, the funding landscape remains uncertain. Despite these challenges, we have been collaborating with Powerlink on potential infrastructure works, particularly focusing on access roads required for the CopperString line infrastructure. We are confident that our current workforce is not and will not be under any threat, and we remain committed to ensuring ongoing work continuity for our road crews.

Additionally, we are actively seeking funding for the remaining 11km of the Kennedy Development Road, which, while located in Etheridge Shire, continues to be a priority with our agreement to a 50/50 shared work arrangement between Flinders Shire Council road crews and Etheridge workforce. We are advocating persistently for its completion. Recently, we successfully installed the rest area near the Maiden Springs turnoff, and are pursuing efforts to enhance telecommunications along the Kennedy Development Road (Hann Highway) to assist our transport operators and tourists with increased connectivity.

Further projects which remain on Council's agenda is a pedestrian bridge across the Flinders River to enabled widening of the current Ernest Henry Bridge, and progressive sealing of the Hughenden-Muttaburra Road. While funding is not currently available, we will continue to advocate for both of these projects and continue with the floodway upgrades scheduled for the Hughenden Muttaburra Road during this financial year.

Our rural roads maintenance is ongoing, and we look forward to contributions from the community during our rural advisory groups. These groups are tailored to receive and act upon the insights provided by our

residents. We understand that each section presents unique challenges at different times of the year, and we are keen to work with you to identify programs that will improve our roads and ease of use. Your input is invaluable in helping us maintain and enhance our rural infrastructure.

Plant Purchases 2024–2025

Flinders Shire Council has allocated a substantial budget of \$2.3 million for plant purchases as part of its 2024–2025 program. This investment is aimed at acquiring new equipment and machinery essential for maintaining and enhancing the Council's operational efficiency across various departments. The significant allocation underscores the Council's commitment to upgrading its infrastructure and ensuring that its workforce is equipped with the necessary tools to perform their duties effectively. By investing in new plant and equipment, the Council aims to improve service delivery, reduce maintenance costs, and increase overall productivity, thereby supporting the long-term growth and sustainability of the community.

Minor Works

The Flinders Shire Council has various projects funded through different programs and initiatives, emphasising community connection, infrastructure development, and cultural enrichment.

- QRRRGR1 – Community Connection:** This initiative focuses on improving community engagement through digital noticeboards and enhancing the amenities at Flinders Sports Ground. The total funding allocated is \$589,271 with significant contributions from grants and Council funds.
- North West Minerals Province (NWMP):** The Grand Hotel site development at Hughenden Prehistoric Park is a key project under this initiative, with a total funding of \$120,000, aimed at boosting local tourism and preserving cultural heritage.
- State Library of Queensland – Bringing Stories to Life:** This project is funded with \$30,000 aimed at enriching the local cultural landscape and providing residents with greater access to literary and educational resources.

Water Budget allocations (Subject to approved funding):

- Water – Bore No. 2 – Switchboard:** A vital upgrade to the switchboard for Bore No. 2, ensuring better control and management of water resources. The total cost for this project is \$60,000 with \$24,000 coming from Council funds and \$36,000 from grant funds.
- Water – Purchase of New Bore No. 5:** This project involves the purchase and installation of a new bore to enhance water supply capacity. The total expenditure for this project is \$320,000

with Council contributing \$128,000 and grants providing \$192,000.

- **Pumps Replacement – Pump Station 1 & 2 NH 1:** Replacing pumps at Pump Station 1 & 2 NH 1 to improve water pumping efficiency and reliability. The project cost is \$60,000 with \$24,000 from Council funds and \$36,000 from grant funds.

Wild Dog Levy

The Special Rate is utilised for the control of wild dogs on rural properties throughout the Shire. The Special Rate will partly fund the costs of undertaking co-ordinated baiting, including the Rural Lands Officer's and supporting Administration Officer's time, plant and equipment, supply of prepared baits, and payment of bounties.

The new Rural Advisory Group will enable direct community input to the Council on wild dog control. It will replace the inactive former Wild Dog Advisory Group and include Councillors, Council officers, contractors, and rural property owners. This diverse group aims to improve coordination and address all aspects of our rural community, including wild dog management.

We currently employ three trappers who collectively have eradicated 392 dogs in the past 12 months. If you do not currently access this service, please reach out to the Council to request a trapper or to obtain further information on the program.

Council's Wild Dog Scalp Bounty is currently \$50 per scalp.

General Rates

In planning for this Budget, Council undertook a series of workshops to model various scenarios of rates and utilities charges. At the forefront of our decision making was balancing the costs of service operations, with the impact of increasing cost of living expenses impacting all families in our Shire. Our total rates and utility charges accounts for 12% of Council revenue.

Below is a summary of the percentage increases for the 2024–2025 financial year.

Charge Type	% Increase
Residential	3.8%
Commercial	3.9%
Industrial	3.9%
Rural	3.9%
Extractive	3.9%
Renewable Energy	33.3%
Cleansing	3.6%
Sewerage	11.7%
Water	16.0%
Wild Dog Levy	3.9%
Total	8.76%

Increase in Renewable Energy Rates

The 33.3% increase in renewable energy rates for the upcoming fiscal year is a critical adjustment due to past charges not aligning with other renewable energy centres. This adjustment reflects our recognition of Flinders Shire's significant wind resources, which have attracted considerable interest from private investors seeking to develop and expand renewable energy projects in our area.

To ensure our services are adequate and that a balance is achieved, this rate increase is necessary. It will help protect our community's way of life, while ensuring fair compensation for the resources and infrastructure supporting these renewable projects.

Although this increase may seem substantial, it brings our rates in line with those of other renewable energy centres. As new projects come online in the coming years, this alignment will ensure consistency and sustainability in our revenue, supporting both community development and the growth of renewable energy in Flinders Shire.

Facilities

We understand that financial returns cannot be achieved on all our assets and that community service obligations are equally important, especially concerning our basic service infrastructure and community facilities. While we strive to achieve a balance, this is not always possible, particularly considering our ageing infrastructure.

We ask that the community recognise the expenses these facilities incur annually to the shire. We are committed to upholding these service obligations and making improvements when feasible. We thank you for your ongoing support of these facilities and encourage you to provide input via the various advisory groups and user group meetings. Your feedback is invaluable in assisting us to make sound judgements on improvements and grants moving forward. We have included some budget examples on selected facilities to demonstrate the financial responsibility.

Hughenden Centre for the Aged and Hammond Court

During the first few months of our first term, the Flinders Shire Council elected members engaged in productive discussions to address maintenance issues and implement minor capital works to ensure the long-term viability and sustainability of our Hughenden Centre for the Aged. We have committed to the following improvements:

- Install CCTV cameras
- Upgrade to an automatic sprinkler system
- Enhance fire exits
- Implement user-friendly door handles
- Optimised storage space and modified cabinets
- Rectify fire alarm concerns
- Address trip and fall hazards
- Introduce new communal outdoor furniture settings
- Establish shade-covered BBQ area for family gatherings
- Enhance the landscape.

A resident's suggestion of a solar/renewable capital works project to reduce future residents' electricity costs was also explored, along with discussions on the potential expansion of Hammond Court to include more elderly-specific units, the installation of new accessibility ramps, and further landscaping enhancements. We look forward to progressing these improvements over the course of our term.

Pensioner Rate Discounts

To support our senior residents, we retained a 50% discount on Council rates (up to a maximum of \$500 dollars) for the Shire's pensioners. This significant reduction aims to alleviate financial pressures and help maintain a comfortable standard of living. We value the lifelong contributions of our elderly community members and are committed to supporting their well-being.

Hughenden Recreational Lake

Showgrounds, Lake, and Parks Expenditure and Revenue

Total Expenditure: \$2,213,621

Total Income: \$49,589

The significant difference between expenditure and income underscores the Council's commitment to providing and maintaining high-quality community facilities. While the income from these facilities is modest, the investment in their maintenance is essential to ensure they remain accessible, safe, and enjoyable for all residents.

These facilities are vital for community well-being and play a crucial role in fostering community spirit and providing recreational spaces. The Council remains dedicated to these investments, understanding the importance of these facilities for the quality of life in the Flinders Shire.

Hughenden Memorial Pool

The Council has identified the need for a new pool facility and is actively exploring opportunities for funding through various channels, including current projects and government support. The transition from outsourced management to in-house operation has added pressure on Council operations and users of the facility. As a result, the Council is considering reinstating a management structure for the pool facility. The estimated cost for maintenance and operations annually is \$392,652 with a return of \$8,000 in revenue.

Hughenden Saleyards

The Budget has allocated funds for remaining improvements, combining \$500,000 funding from the Department of Transport and Main Roads with an additional \$300,000 from general reserve funds. These improvements are scheduled for completion by the end of this financial year. They include:

1. Upgrades to the Dip (a new shade structure on the western side)
2. Extension to the existing hay shed
3. Concrete pad adjacent to the loading ramp walkway.

The recent cessation of rail cattle at the Richmond yard has increased rail cattle loading at the Hughenden facility. Despite this increase, the facility, being leased, does not generate additional returns beyond the lease income, resulting in a negative return on investment for the shire. Significant funds have been spent on yard expansions in recent improvements.

While financial returns are important, we are committed to providing this service to the rural community and to support a new business within the shire, acknowledging that our obligations sometimes extend beyond mere financial considerations. Moving forward, we seek to invest wisely in this facility, with a focus on much-needed internal yard improvements that have been neglected for many years.

Reserves

We recently auctioned some of our reserves in the district for another three years, with 2 x 12-month rollover conditions. The leases are structured in this

manner to provide security to the grazier and Council, ensuring that the land and its fodder resources are responsibly managed. These contracts return \$233,512 to the Council's operational budget annually.

We acknowledge that further weed management is required to maintain our commitment to being environmentally responsible landholders and seek to lead by example moving forward.

Works for Queensland Funding

Council has submitted projects for the Works 4 Queensland Funding package, which included:

1. Improving the Quality of Town's Potable Water – \$400,000
 - We are committed to ensuring the delivery of high-quality potable water. This funding will support extensive investigations and remedial measures to address turbidity and pressure issues within parts of our water network.
2. Drinking Water Bores Upgrade – \$100,000
 - Upgrading bores 2 and 7 is essential due to their age and condition, which pose potential threats to our continuous water supply.
3. Showgrounds Improvements – \$650,000
 - The Showgrounds Masterplan is complete, but we must prioritise and cost the works. This funding will help us enhance this vital community space.
4. Staff Housing – \$450,000
 - Addressing the lack of suitable housing is critical for attracting and retaining staff.

Community Grants

Our commitment to community welfare and development is further demonstrated by the Council's Community Grants Program. This program provides financial aid and support to various community initiatives, with enhancements including year-round grant availability, increased funding for program and event support, and special request funding for major events. We have more than doubled the financial commitment to each of these grants in the 2024–2025 Budget.

- Program and Event Support Stream funding increased from \$1,000 to up to \$2,500
- Program and Event Development Stream funding increased from \$5,000 to up to \$10,000
- Facility and Equipment Stream funding increased from \$5,000 to up to \$10,000
- Special request (major events, activities and infrastructure) is a new funding pool available to major events and activities which aim to support economic development and visitation goals, with up to \$20,000 available.

Community Bus

Following feedback from community groups, Council has reviewed the fees and charges for use of the community bus for out-of-town use. A discount of 30% will now apply for use of the bus by community groups for out-of-town travel.

Community Clubs and Facilities

To assist our clubs with rising operational costs and to ensure consistency, Council will provide a standardised fee for local clubs hiring Council facilities for training purposes. The annual fee will be \$300 per annum, and will be applied to the Swimming Club, Netball Club, Gymnastics Club and clubs utilising the sports ground for training. This subsidised fee is in addition to our substantial grants program that groups can access to receive further support outside of this generous yearly fee.

Community Advisory Groups

Continuing our commitment to community, Flinders Shire Council has taken a proactive approach to community engagement by forming four distinct Advisory Committees tailored to address various aspects of community life. These committees are:

1. Community Services and Wellbeing Advisory Committee
2. Economic Development and Business Advisory Committee
3. Rural Advisory Committee
4. Hughenden and Small Towns Advisory Committee.

These committees have been strategically structured to focus on critical areas such as health services, aged care, youth programs, First Nations initiatives, tourism, local business development, events, roads, and rural lands. The Council's primary objective is to cultivate a deeper understanding of community needs and priorities, fostering collaboration and transparency in decision-making processes.

By actively seeking input from community members and stakeholders, the Council aims to ensure that its actions and projects align closely with the desires and requirements of the residents. Through these advisory committees, the Council is committed to building a more inclusive and direct relationship with our community.

I strongly encourage you, your community group, your business, or any other supporting group to attend these advisory groups. This is not an invite-only advisory group, and each of you has a valuable contribution to make. The minutes from these meetings will be officially tabled in the Monthly Council meetings, creating an opportunity for you to directly feed into the decision-making processes of the Council.

Major Projects

Powerlink Workers Camp

We acknowledge the challenges accompanying large investments in small regional communities, particularly in infrastructure strain. Working closely with stakeholders, we plan infrastructure upgrades that support sustainable growth and seek to enhance resident quality of life. Most notable for our shire is the construction of Powerlink's workers camp on the eastern side of Hughenden. We are pleased that Powerlink have recognised their responsibility to improve services, which include the extension of water and sewerage services to the site, and the necessary upgrades to the water and sewerage networks to cope with the increased demands and loads from the 410-person accommodation camp.

We accepted the Powerlink Local Participation Plan for the CopperString project, which includes key elements to ensure significant local involvement and benefit. Local participation is defined within a 125km radius, with a 10% weighting for locals as per Queensland Government requirements. As of June 2024, 18 suppliers in Flinders Shire are registered under the FLGA Suppliers initiative, demonstrating active local engagement across all supply chain levels.

The Local Employment Participation Provisions (LEPP) apply to all sub-contracts, including Atco's camp construction in Hughenden. While local suppliers must remain competitive, there are substantial opportunities for them, particularly in camp construction and operations. Additionally, the project features a Local Business Capacity Development Program, which offers workshops to develop local businesses, accessible to all, whether they are tendering for the project or not.

We are committed to ensuring that all contractors uphold their commitments to our community, services, and infrastructure during the construction of both the camp and the transmission line. We are adapting to new circumstances and have acknowledged the need to review internal processes, especially in waste control, health service demands, water access, and their social impacts. Monitoring closely, we maintain a strong partnership with Powerlink officials. If you have any concerns regarding this project, we encourage

Sod turning for CopperString 2032

you to discuss them with the Council. Our primary goal is to prioritise the needs of our community and local businesses, ensuring effective support for their interests.

CopperString 2032

Flinders Shire Council is dedicated to working closely with companies, such as Powerlink, to minimise the impact on ratepayers while securing long-term legacy infrastructure projects. These projects will not only meet immediate needs, but also foster sustainable growth and enhance the quality of life for all residents.

Some of the legacy projects we are considering in our negotiations with Powerlink include:

- Modern Light Weight Modular Housing for Powerlink Key Project Staff
 - We are advocating for Powerlink to build semi-permanent housing in Hughenden that can transition from project use to community use.
- Partial Retention of WAF for Future Use
 - We are exploring opportunities for retaining parts of the Worker Accommodation Camp (WAF) for future Council and community needs.
- Enhancing Community Amenities
 - Our plans include lake upgrades, and various infrastructure improvements to community amenities.
- Supporting Population Retention and Growth
 - We are committed to creating conditions that support the retention and growth of our population.

- Establishing a Country Universities Centre (CUC) in Hughenden
 - This initiative aims to provide higher education opportunities within our Shire.
- Supplier Development Program
 - We seek to develop local suppliers' capabilities to participate in the CopperString 2032 project and other future procurement opportunities.
- Cultural Heritage and Preservation
 - In partnership with the Yirendali people, we plan to establish a cultural heritage artefacts storage area. This will safely store materials for future cultural use and include the development of a Yirendali language book.
- Improving the Capacity of the Hughenden Waste Facility
 - Enhancements to our waste facility are crucial for meeting future demands.
- Addressing Mobile Phone Blackspots and Providing Fibre Connectivity
 - We aim to improve mobile coverage along the Flinders Highway and provide fibre connectivity to key council properties, enabling 5G mobile coverage for Hughenden.
- Airport Upgrade
 - Upgrade to the airport is required to meet project demand.

Airport Master Plan

Flinders Shire Council had previously completed an airport master plan aimed at enhancing our aviation infrastructure. The plan included several key developments:

- Expanding the aircraft apron area
- Extending the terminal
- Installing additional hangers
- Creating a traffic turnaround.

Despite the comprehensive nature of the master plan, it was never formally adopted. Recent discussions with Powerlink and the potential increase in facility usage have brought the master plan and additional tarmac improvements back into relevance. These conversations highlight the ongoing importance of the proposed enhancements to accommodate future demand.

As we evaluate the current and future needs of our community, the master plan's objectives remain crucial. We are committed to ensuring that our airport infrastructure can support increased traffic and serve the growing needs of both our residents and businesses. This project is estimated at \$10 million.

Hughenden Off-Stream Water Storage and The Hughenden Irrigation Project

The search for water storage in the Shire to capitalise on the demand for the irrigated agriculture industry has come at great expense. To date, more than \$1.3 million has been expended on the Hughenden Off-Stream Water Storage Project. Unfortunately, this project remains unfunded by government and requires a total estimated investment of \$60 million to secure an approximately 7,000ML storage facility. We undertook a peer review of the current business case and identified fundamental flaws with both design and economics that require significant attention.

Feedback provided to Flinders Shire Council by Federal and State Governments emphasised the need to broaden and diversify the benefits and users of the water to meet government investment criteria. Currently, the project serves to benefit two primary initiatives, which together require more water than the project can fulfil.

We are committed to ensuring that the funds already invested are used wisely and recognise that water

development is vital to our community's future. The Council adopted a Memorandum of Understanding (MOU) with the Hughenden Irrigation Project (HIPCo) to combine forces, research, and funding to identify the best possible water storage project for our Shire.

As both the Water Bank Project and HIPCo contribute to the current Gulf Water Plan and assessment, it is imperative that we work together to achieve the maximum benefit for our region. The government has a strong focus on critical minerals, which our Shire does not have. However, we possess the best water storage locations due to our topography.

Currently, we are not returning any benefit on the water licences our Shire currently owns, and seek to find commercial solutions for a positive return on past investments.

We intend to be at the forefront during government discussions around storage and water development in the Flinders and Gulf region, ensuring our strategic position and topographical advantages are recognised and leveraged for the community's benefit.

Conclusion

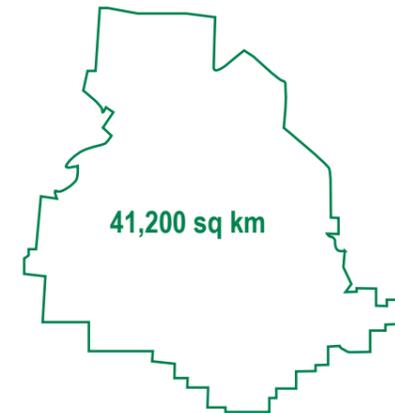

Flinders Shire Council's primary aim is to build a strong relationship with the community, from which we can develop strategies and budgets that address the diverse needs of all our communities. While I acknowledge that not every issue can be resolved within a single budget, I assure you that we approach our responsibilities with a balanced and pragmatic mindset, striving to serve your interests while maintaining fiscal responsibility. Our foundational services must be strong.

Appreciation

I would especially like to thank the staff of Flinders Shire Council. We understand the workload you all carry to deliver our annual Budget and are appreciative of your efforts. All staff and contractors execute the operations of the Council each day, and we value your service.

Additionally, I extend my gratitude to our Interim Chief Executive Officer Bruce Davidson, and the Directors Melanie Wicks, Barbra Smith and Misenka Duong. Thank you for your efforts and meticulous planning and advice throughout this Budget. Your departments and support staff are greatly appreciated, and we look forward to assisting you in the delivery of this Budget and drafting revised Corporate and Operational Plans.

Cr Kate Peddle
Mayor, Flinders Shire

\$280.4 million
Total Property Plant & Equipment (assets)

- 1941.4km of council roads
- 74.1km of water mains
- 14 parks
- 15.64km of footpaths
- 1 sewerage treatment plant
- 3 water plants
- 2 aeroplane landing areas & 1 airport
- 3 cemeteries
- 1 library
- 1 customer service centre
- 1 visitor information centre
- 1 swimming pool/aquatic centre
- 1 community gymnasium
- 18 aged care accommodation/units
- 1 saleyard
